

## North - West Region

Sunday, 24 May 2009

The North West planning region includes Districts of Vidin, Montana and Vratsa. The main industries are in the energy, chemical sectors, agricultural sector and village tourism . The leader in the energy sector is the nuclear power plant "Kozlodui", generating 43% of the total electricity in the country.

The most attractive natural phenomena are the Belogradchik rocks and the Ledenika and Magura caves. The healthy mineral springs in the region should support the growth of the main tourist centre at Varshets. The various artificial lakes and the Danube river are also important for tourist development
